

Agilis™ feeder trade-in campaign.

Upgrade your Agilis system.

Improve your process with all new Agilis feeders.

Mycronic's Agilis feeder system revolutionized the high-mix SMT industry, enabling customers' change over process to become the most efficient possible. This trade-in campaign offers customers the possibility to continue to improve their processes with all new feeders at a fraction of the cost.

IMPROVED RELIABILITY AND EASE-OF-USE

- The Mycronic Agilis feeder is well-renowned globally for its simplicity, kitting-speed and robustness. The new revision A feeders build on all those benefits while improving pick-up rate and ease-of-use even further. Customers upgrading to the new generation feeders have experienced substantial improvements and reduced reject rate.
- The Agilis 8 mm revision A feeders have undergone several mechanical modifications, focusing on improving pick-up reliability. Typical results indicate a reject reduction of 90% for 0402 components and 40% for 0603 components.
- The Agilis feeder trade-in offer allows customers to purchase any number of 8/12/16 mm feeders and return the same number of used feeders, regardless of age or condition.

TECHNICAL REQUIREMENT:

- New Agilis feeders are completely interchangeable with all previous revisions.
- No additional hardware upgrade is required.
- Recommended to upgrade to the latest software version.

PART NUMBER	DESCRIPTION
L-014-1395	Agilis feeder 8 3.7
L-014-1320	Agilis feeder 8 4.0
L-014-1319	Agilis feeder 8 4.7
L-014-1321	Agilis feeder 8 5.4
L-014-1490	Agilis feeder 12 8.5
L-014-1552	Agilis feeder 12 7.5-9.5
L-014-1492	Agilis feeder 16 12.5
L-014-1553	Agilis feeder 16 11.0-13.0
