

## **Mycronic Group Quality and Environmental Policy**

Mycronic's vision is to be the most trusted partner to the creators of tomorrow's electronics.

We are dedicated to protecting the global environment by mitigating the environmental footprint of our products and operations across the entire value chain, integrating sustainability in everything we do.

Customer-centricity is an integral part of our business strategy. Excellent customer experience and customer satisfaction are vital for the sustainable profitable growth of our company.

We will achieve this by:

- Creating value in a responsible way and providing innovative high quality, and sustainable solutions to the electronics industry
- Understanding, addressing, and striving to exceed the requirements and expectations of our customers and other stakeholders
- Complying with legal requirements and applicable standards
- Anticipating customers' future needs and building trust by actively collaborating with customers, partners, and colleagues, adhering to our Code of Conduct, and demonstrating care for the environment
- Using a risk-based approach to efficiently respond to challenges and opportunities
- Increasing the awareness of our management system
- Developing our production solutions for increased energy and resource efficiency throughout their lifecycle, enabling product durability, product reuse, ease of repair and responsible recycling
- Using resources efficiency, reducing emissions and waste, employing safe and sustainable alternatives including renewable energy sources, and responsible sourcing strategies, thereby integrating circular economy principles and mitigating climate change
- Enhancing our quality and environmental performance by continuously improving our products, services, and management system processes to best practice with focus on active leadership and contribution from our employees
